Captive Portal API

Draft-ietf-capport-api-02

Tommy Pauly & Darshak Thakore

CAPPORT
IETF 104, March 2019, Prague

Updates
Changes in -02

Added terminology section to extend architecture document with "client" and "API server"

Converge on using "client" rather than "host"

Add NTP whitelisting consideration

Edited JSON keys

"permitted" -> "captive"

Added "vendor-info-url"

Next Steps

Incorporate Kyle's review feedback

Are we done?

More implementation experience
